

# The Countrywide Nutrient Management Service.

## **The Service**

The Countrywide Nutrient Management Service takes farm data to develop a managed and planned approach of making the best use of farm resource along side purchased fertilisers to get the most effective and efficient results.

The data analysis considers available land, soil type and current nutrition status if available, farm manures and cropping.

## **The Results**

Countrywide recommend that the review is updated annually or as a result of a major farm change such as extra land being taken on.

**Elite Nutrition**

*Exclusively Countrywide*

# How to apply...

To apply for the Countrywide Nutrient Management Service, please contact your local Sales Specialist or call 01386 757314.
